I am a full-stack web developer with 3 years of experience in creating and maintaining web applications for various industries. I have proficient knowledge of both front-end and back-end technologies, such as HTML, CSS, JavaScript, PHP(Laravel), PostgreSQL, and MySQL. I have successfully completed several projects, ranging from simple websites to complex e-commerce platforms. I am always eager to learn new skills and technologies and improve my code quality. I am looking for a challenging and rewarding role where I can apply my creativity and problem-solving skills to develop innovative web solutions that meet the needs of the clients.

EXPERIENCE

MAR 2021 – MAR 2022

BACKEND DEVELOPER, ZELUS TECHNOLOGIES

Created landing pages, dashboards and web applications using PHP Framework (Laravel) and Livewire with Alpine JS programming languages.

NOV 2022 – JUNE 2023

FULL STACK DEVELOPER, FREELANCER

Managed both back-end and front-end aspects of development process.

JULY 2023 – PRESENT

FULL STACK DEVELOPER, Rx HEALTH INFO SYSTEM

My main responsibilities were to design, develop, and test software applications for the Rx. Health platform, which is a cloud-based system that enables healthcare providers to manage patient records, monitor vital signs, and deliver personalized care plans.
